

METAL BOCCE/BOULES

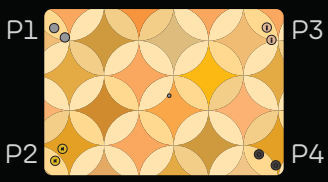

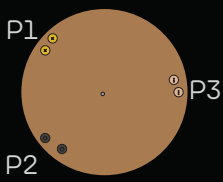

This game will use all of the balls included in the game.

SETUP

Place the small ball in the center of a table, or rug. Give each player two matching large balls, or if playing with 5 or more players, one large ball. Everyone should stay in a circle around the edges of the table or rug.

Randomly select a start player. They will roll one of their balls from the edge of the arena, trying to get it as close to the small ball as possible. Continue rolling one ball at a time in clockwise order until everyone has rolled all of their balls. The player whos ball is closest to the little ball is then declared the winner!

As an alternative, you can play with the rule that any rolls that touch the small ball are disqualified and removed from the game, then reset the small ball to the center.

There are many other classic ways to play Bocce/Boules, feel free to try any way you like!
